Currently a Risk Analyst in Operations at a leading online Live-games supplier Evolution Gaming.

Finishing up my second year as a Bachelor CS student, looking to get a head start and transition into web development roles. Don't have a solid preference to any specific part of it, but do have mostly knowledge of front-end.

Skills:

JavaScript · HTML · CSS · Git · Kanban · Scrum · CI/CD · JIRA · SQL

Experience

Evolution Gaming
Jul 2018 to Present

Risk Analyst   Riga

- Performing game integrity monitoring and analysis
- Observe and detect patterns/trends in user behavior
- Detect and mitigate suspected fraudulent activity using latest AML and anti-fraud techniques
- Providing risk assessments to business customers
- Working with large data sets, providing evaluation, visualizations and concise conclusions based on data
- Implementing automation subroutines for workflow optimization
- Maintaining and creating Wiki pages for internal procedures/documentation
- Create training and educational materials for newcomers and provide training sessions
